Why we do

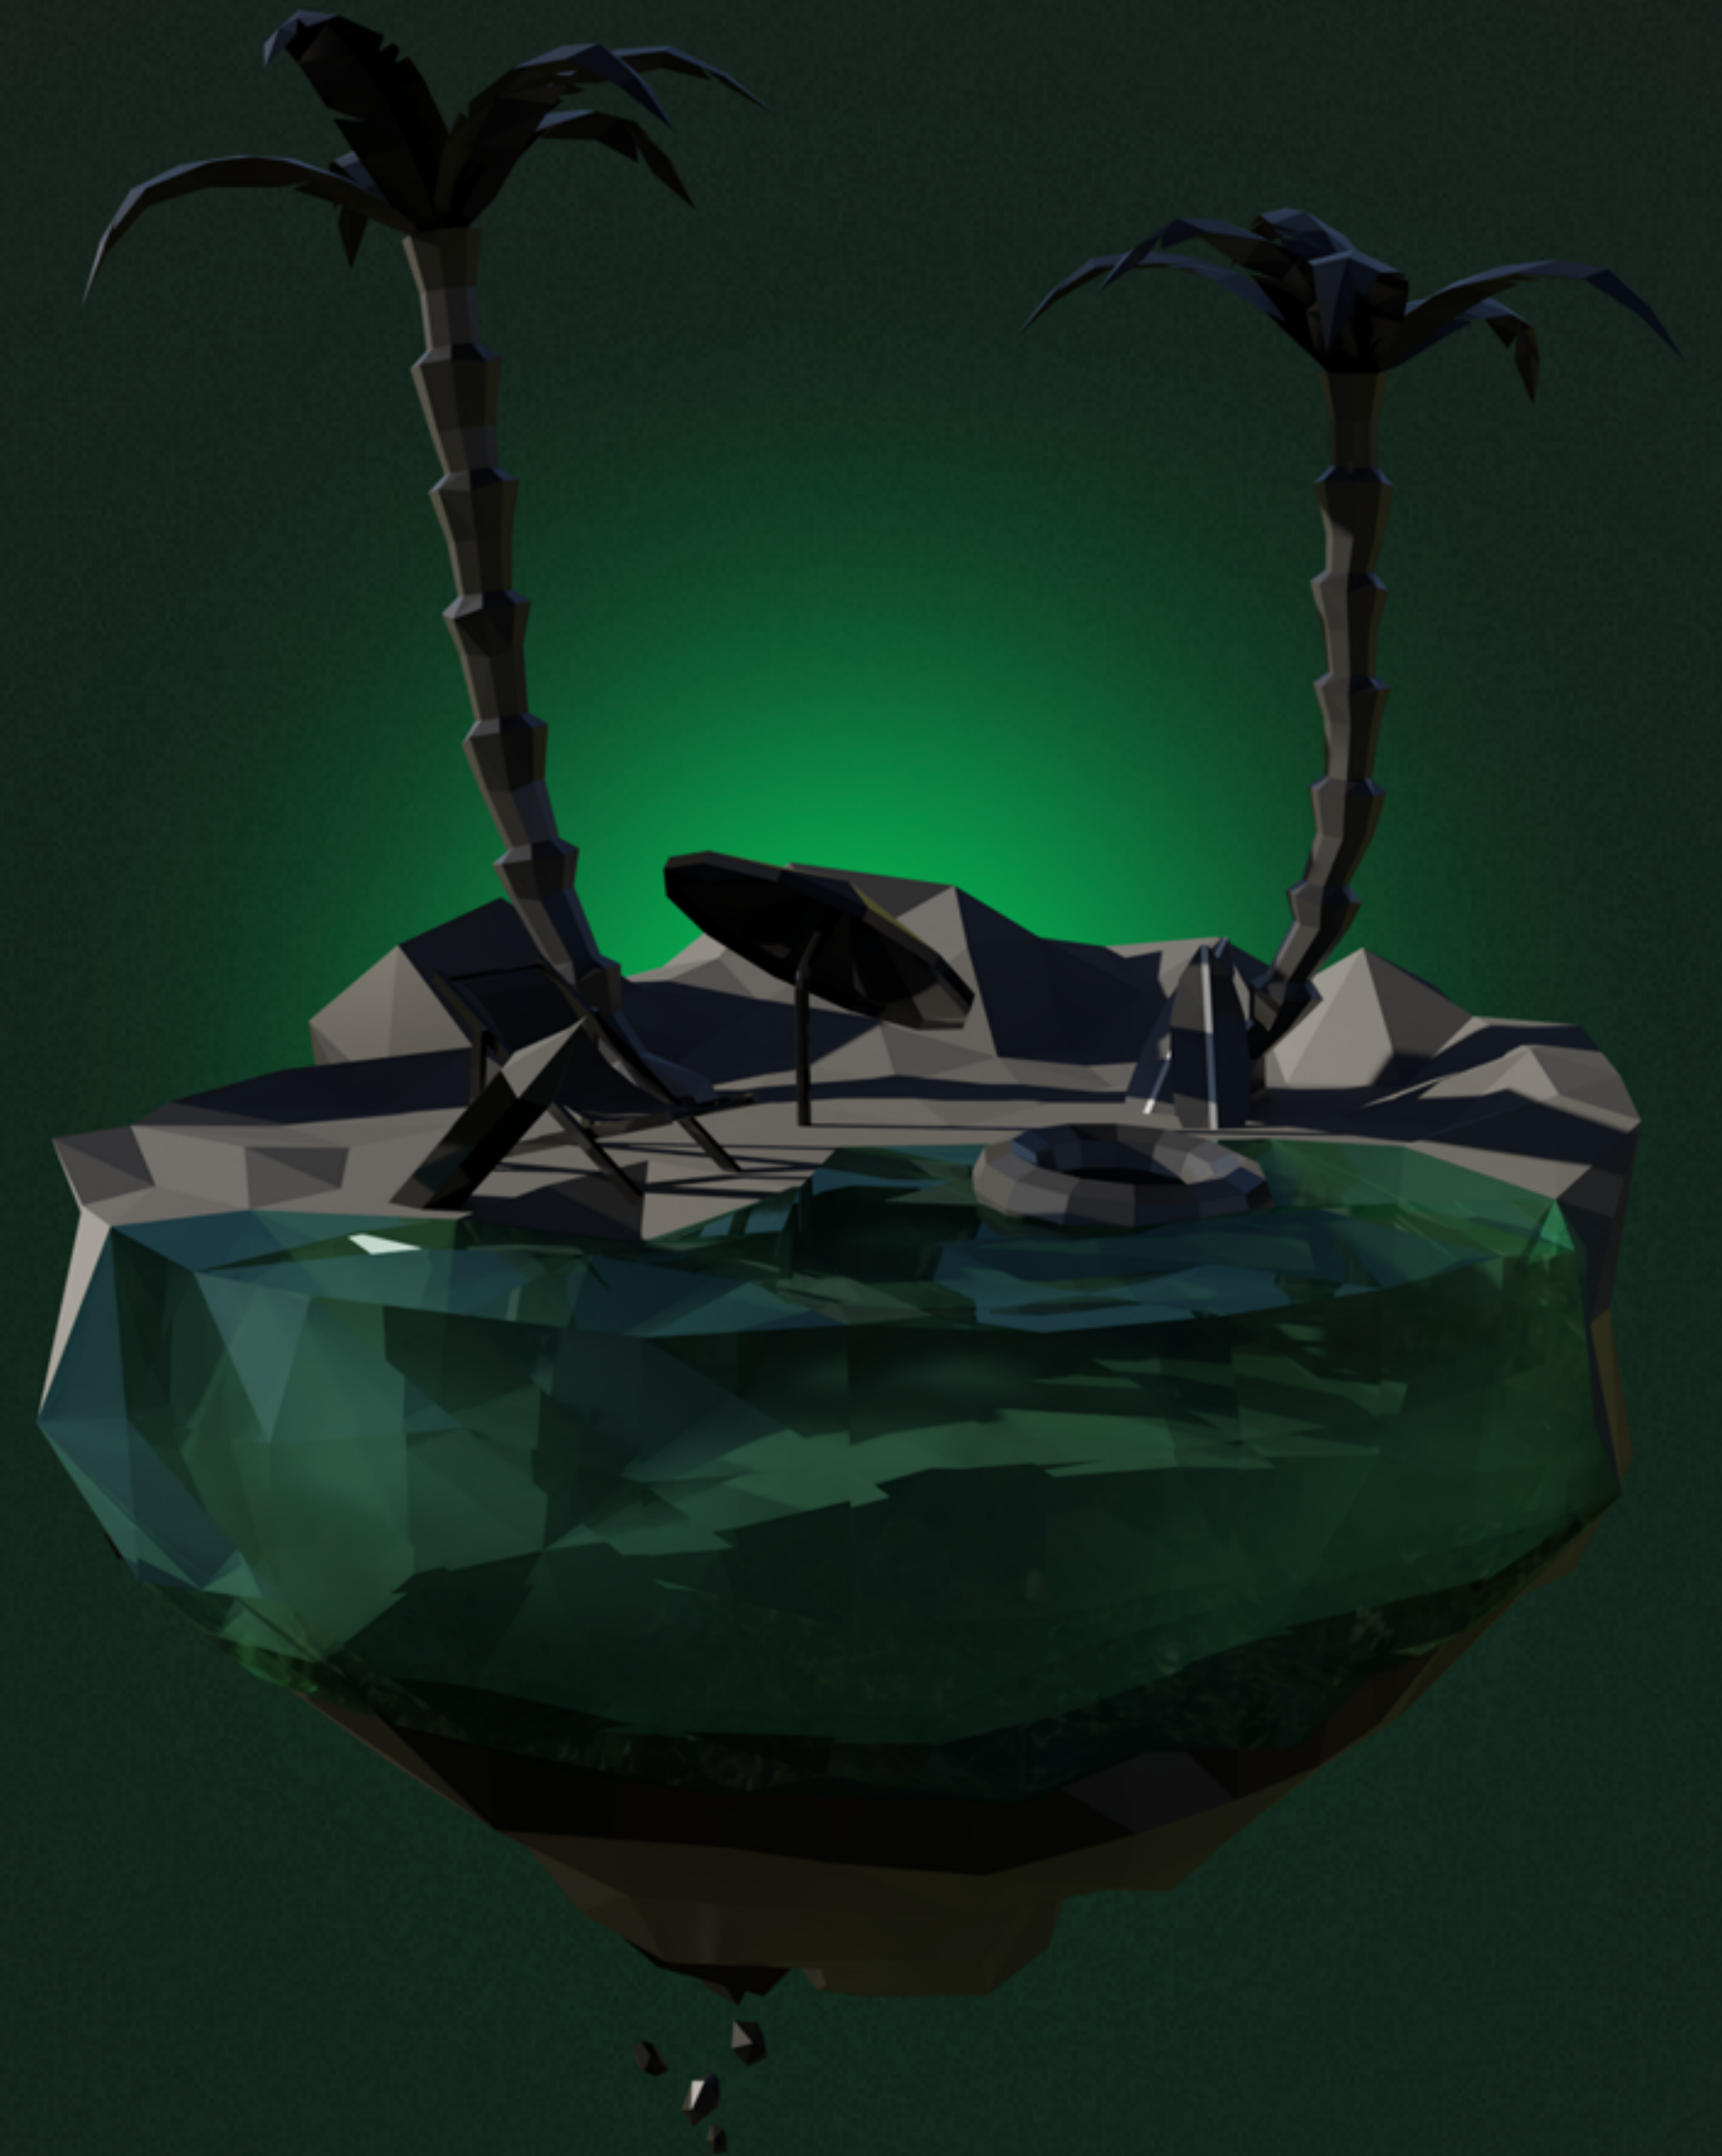

Each of our Customers contributes to the creation of a better, faster, and more comfortable world. But even the Changemakers and the powerful need some rest because it is impossible to carry everything on your shoulders.

Everyone likes to get a breath of fresh air somewhere on the beach, watching the sunlight playing with the waves and the ambience that allows you to leave all your troubles at the coast.

Here at DCoast we know how important to have a clear and peaceful mind while doing business. Therefore, our job is to lessen that burden, alleviating all hurdles in regards to **Branding, Marketing, and Technology for your company**. Doing this with excellence and in accordance with the required timeline. Giving you the space to relax while you do what you love.

So, leave it to DCoast!

Maintaining reputation. Up to date changes. DCoast got you covered. Just do business.

How we do it

Design and development are not art and alchemy. Each project we undertake has a clear goal, whether it's an advertising banner, a corporate website or the metaverse. Therefore, our task is to make sure that the product that we produce corresponds to it.

An individual approach is crucial for our clients, and we help them to differentiate themselves from their competitors, using advanced technologies and the best world practices.

However, we reserve the right not to use low-quality software, but we always recommend the best solutions based on more than **11 years** of experience.

We don't produce the BS.

What we do

Graphic design

3D & Motion

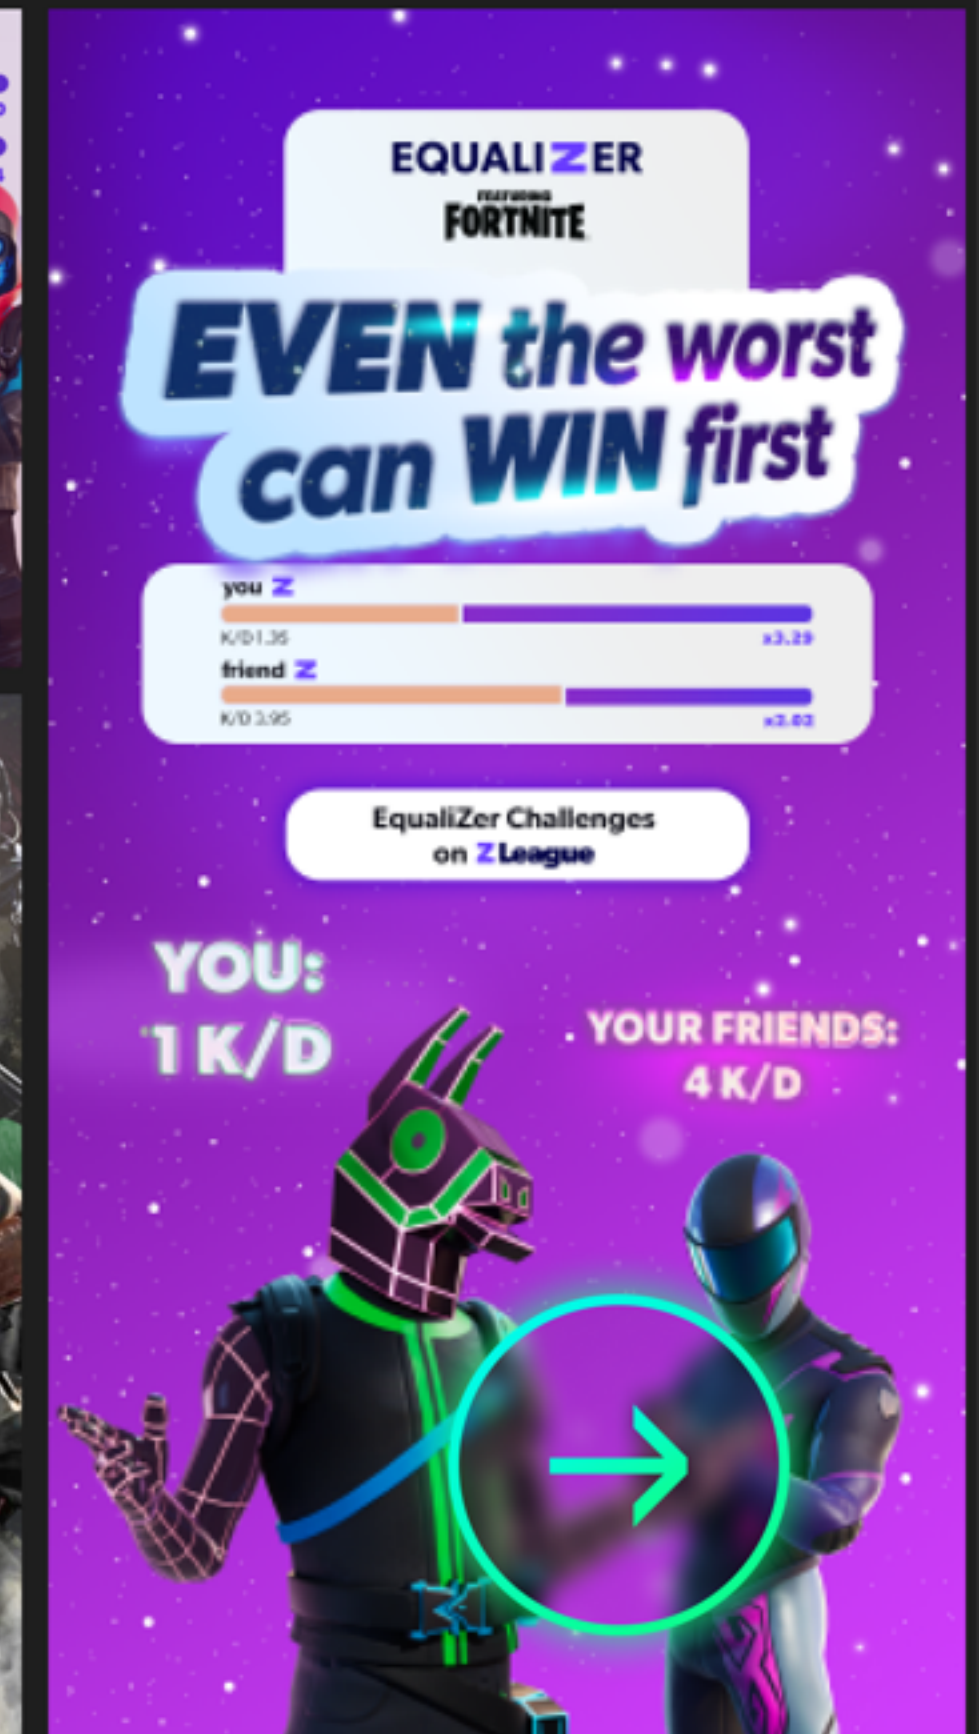

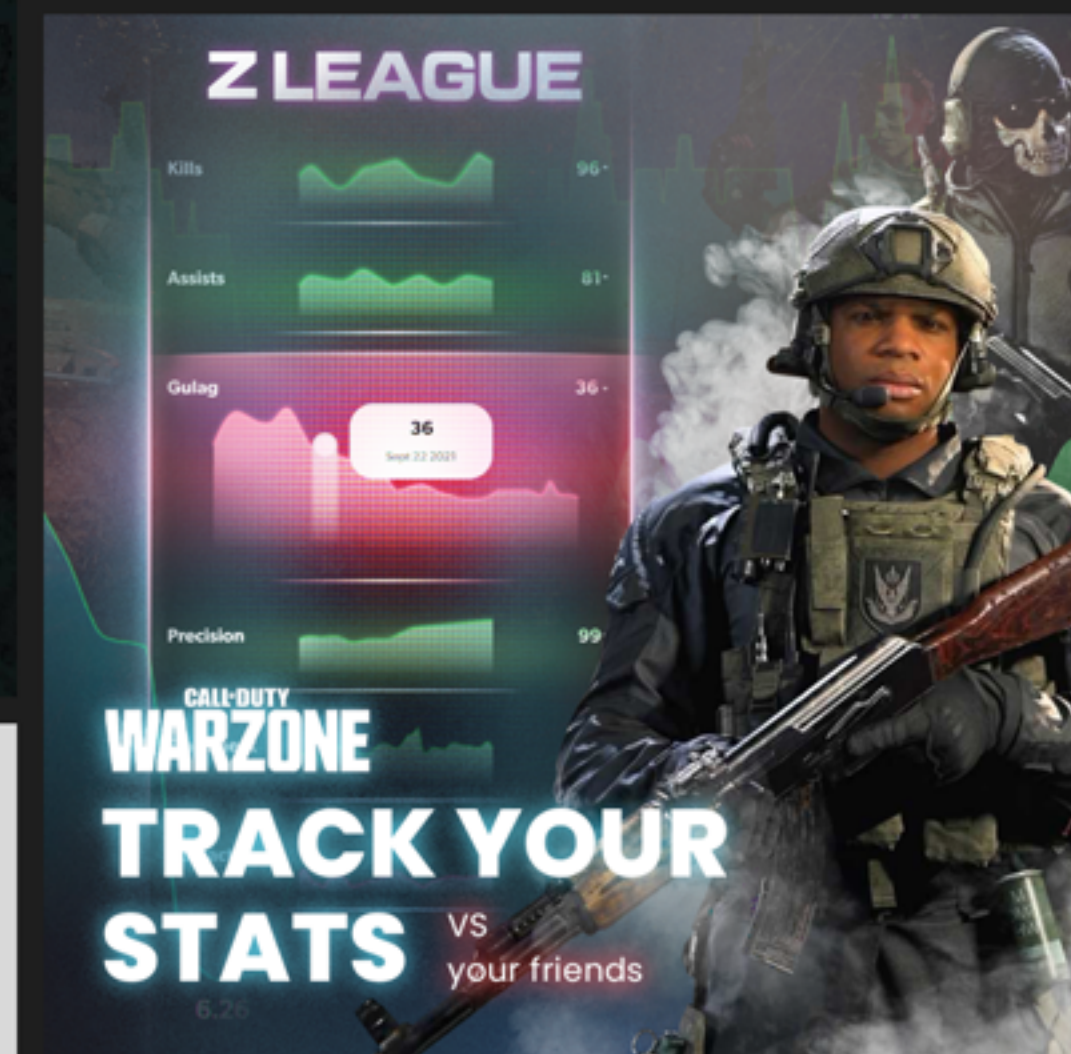

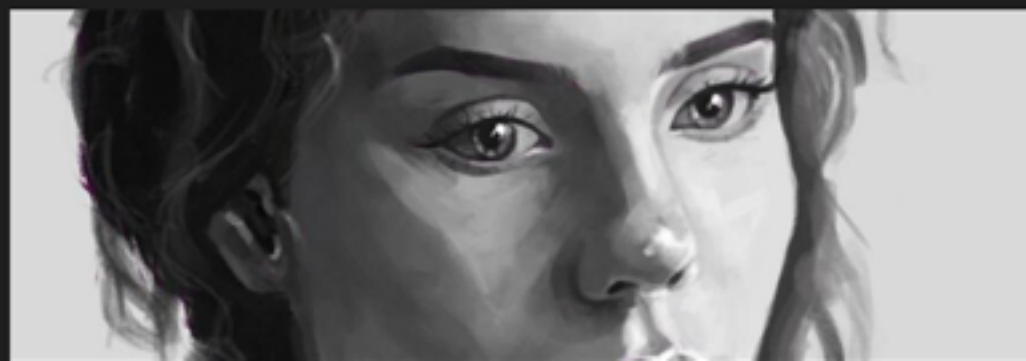

UI/UX design

Graphic design

Today, appearance plays a decisive role. This is not a story about a pretty picture, but about the right empathy and the image that will remain in the subconscious of your target audience with strong association between the product or service and your company. We call this "Voice of the Brand".

So when it comes to Graphic Design - Here are the few things that we can help you with:

- Advertising
- Marketing collateral
- Imagery
- Photorealistic content
- Print Design
- Characters creation
- Animation

3D & Motion

The Metaverse is here :)

Nowadays, with the growth of blockchain technologies, augmented reality advertising and the gaming industry with market caps that surpasses film making, it's obvious to everyone that either you follow the trend or...

... although maybe someone still uses pager:)

Anyway, if you need assistance with that - we can help with the following:

- Product creation
- Modeling
- Characters
- Game assets
- Environment
- Motion

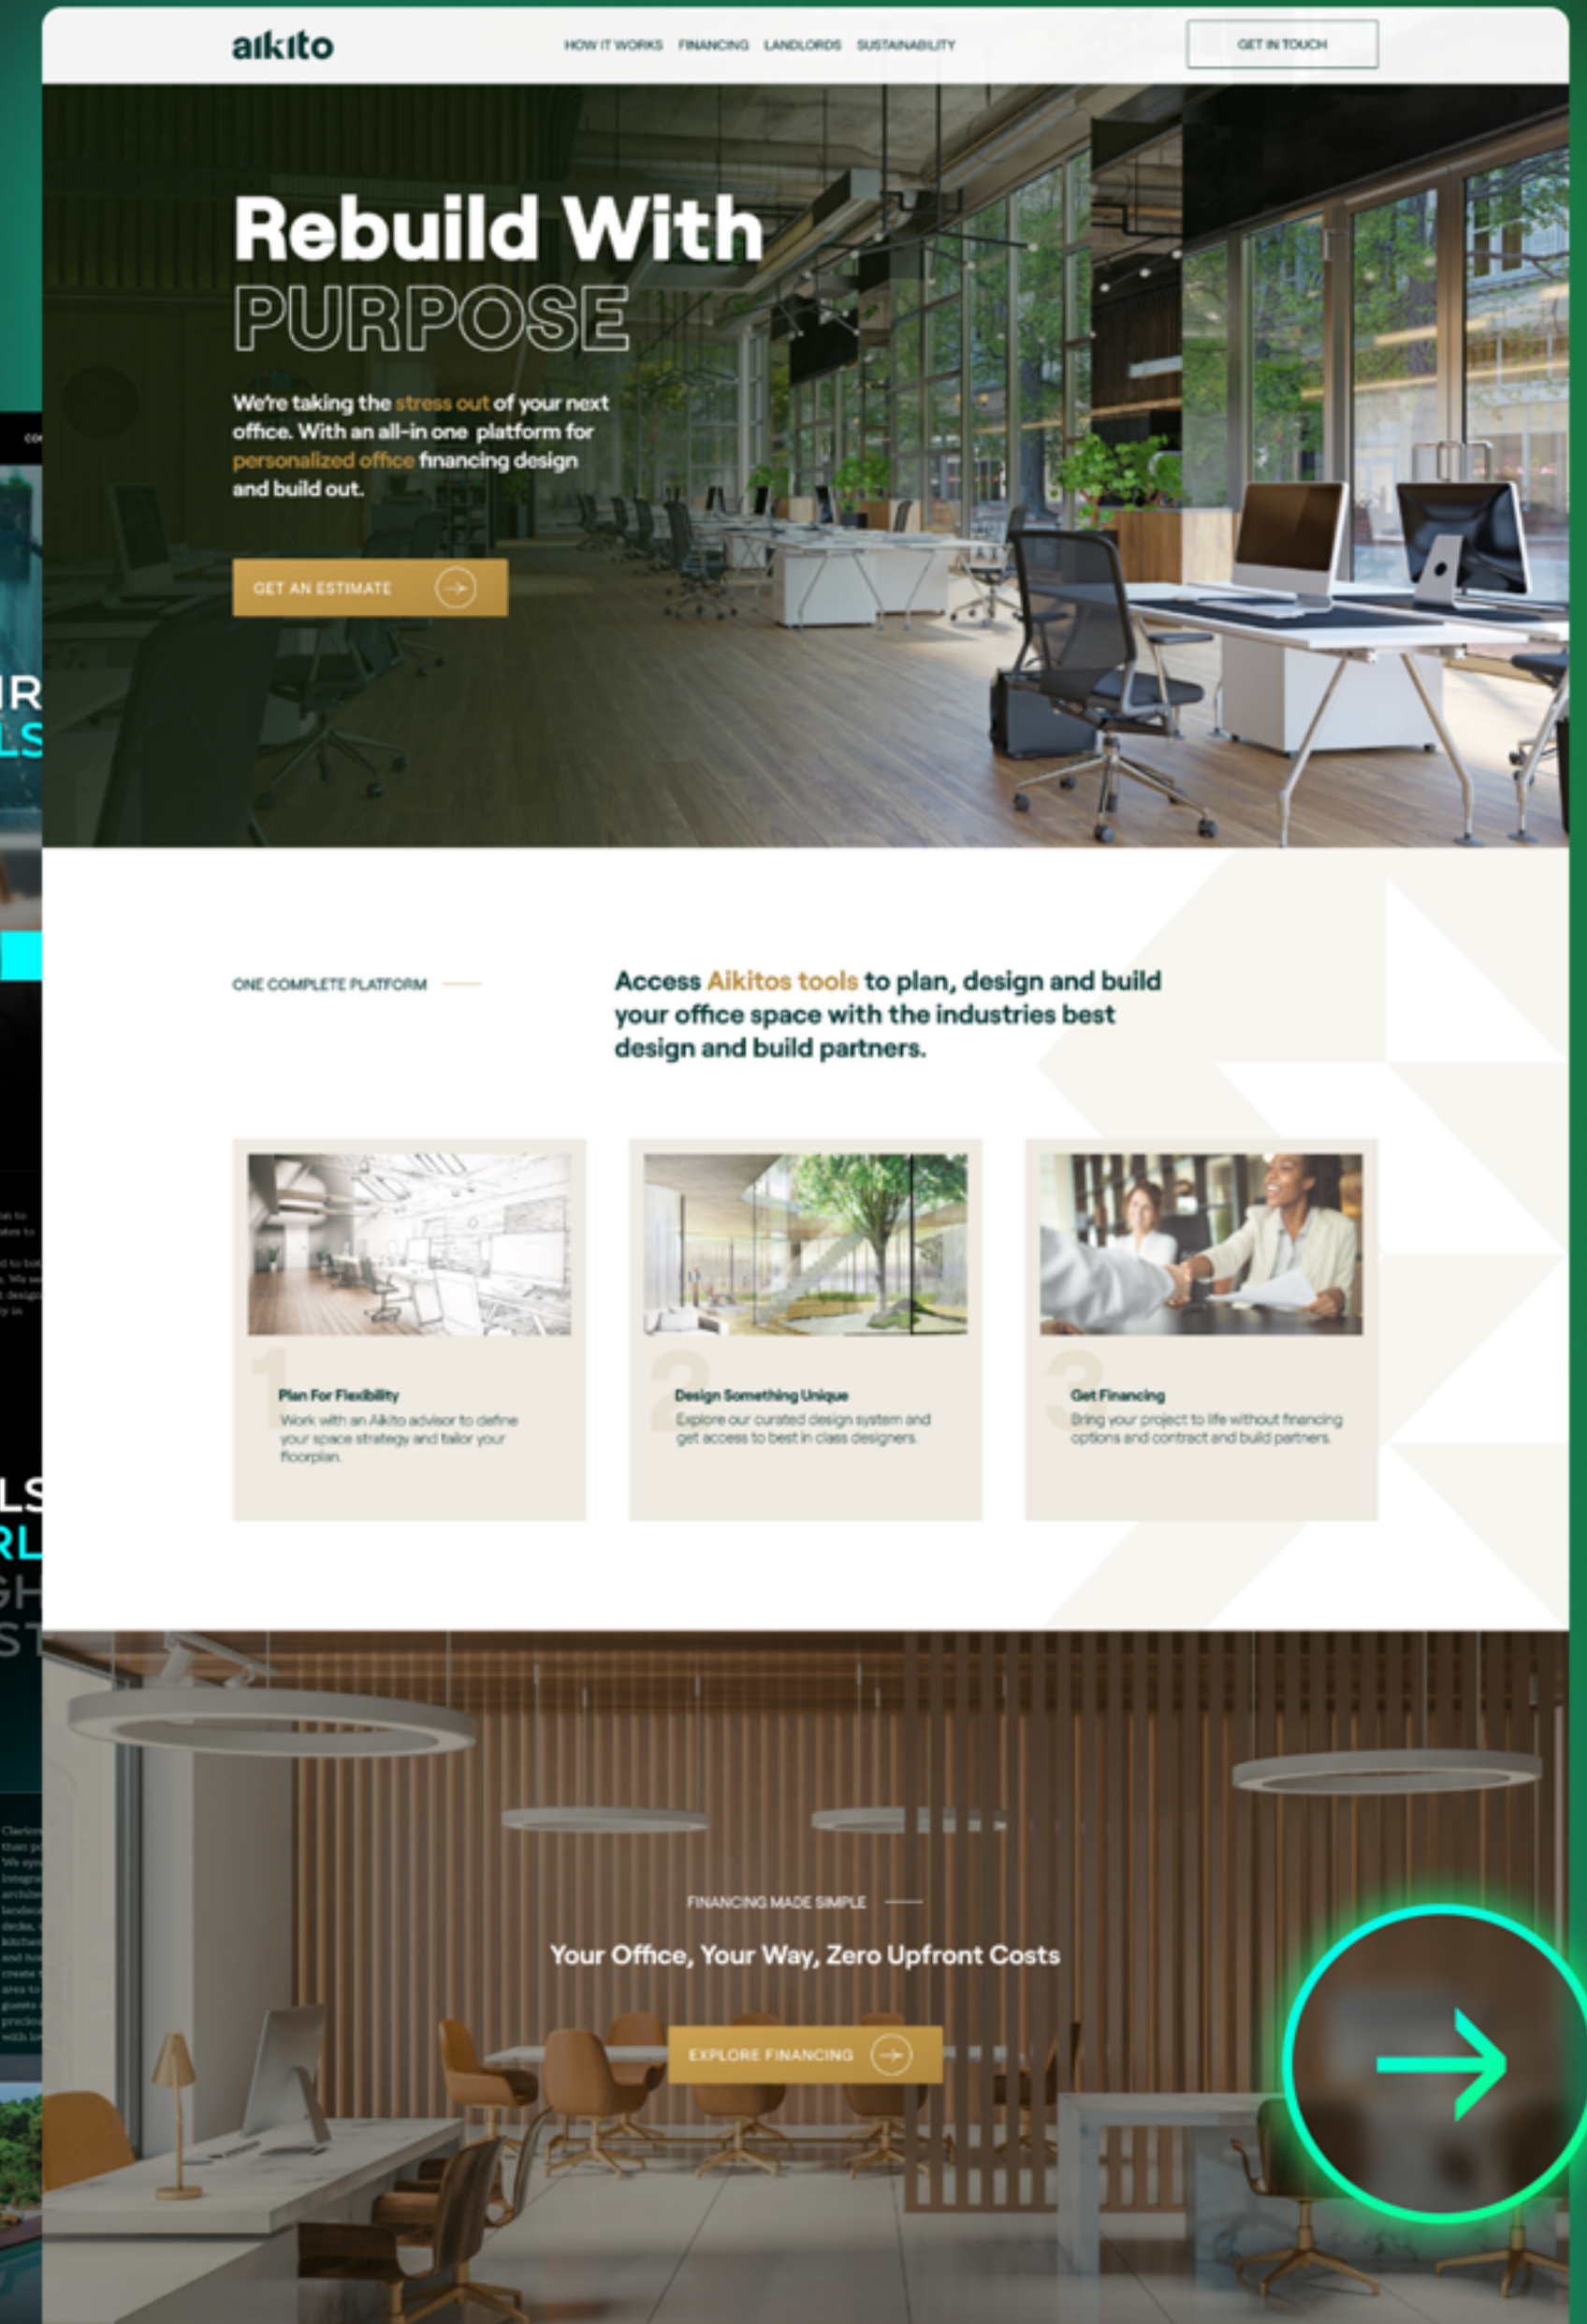

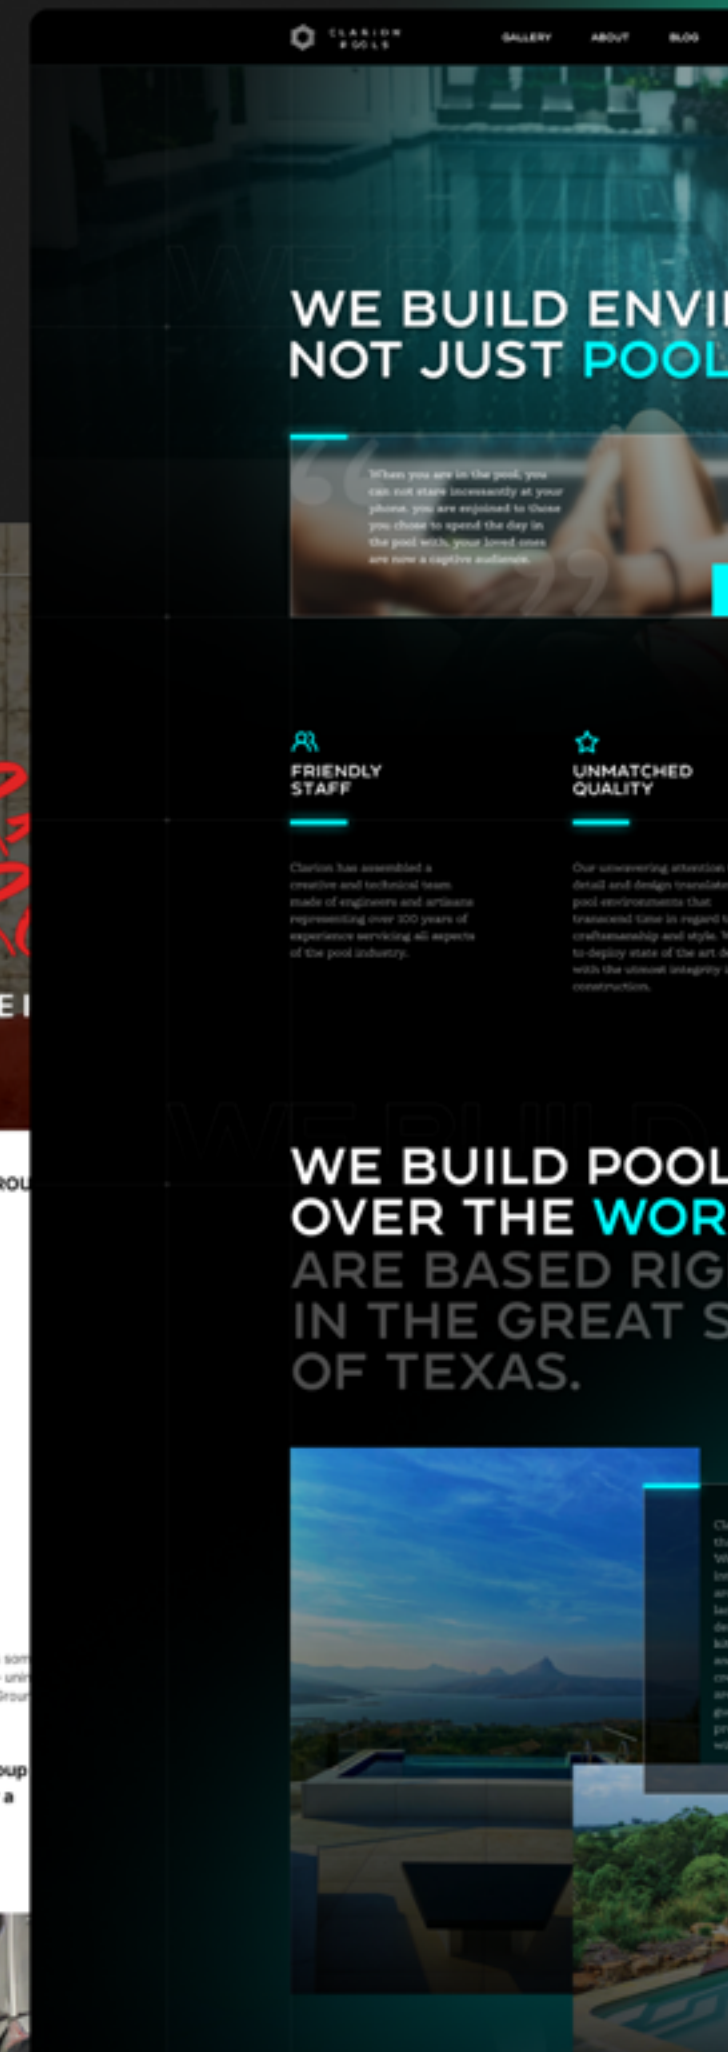

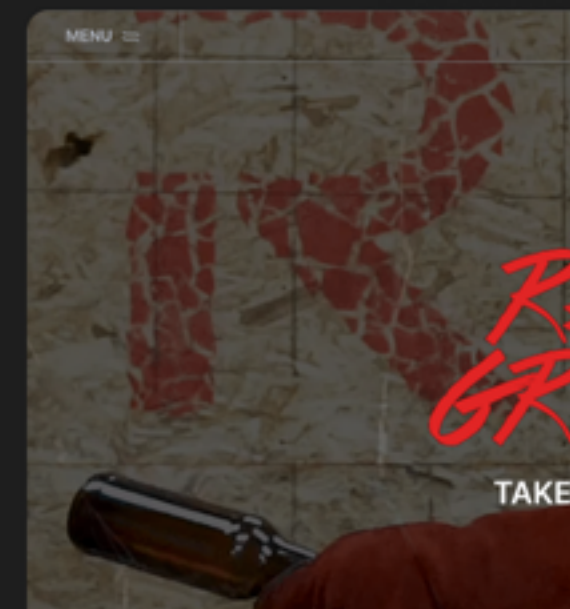

UI/UX design

Here we go!

Do you have a SaaS product that requires a deep understanding of the behavior and user experience of your target audience? Have you found the blue ocean and need advice on how to capture early adopters with outstanding App? Or you need a Brand website, not like your neighbor's, made on the knee by a student from a third world country?

There are 2 Billion websites over the Internet, but your target audience only needs one, right? Which one?

- Landing Page
- Corporate
- Online Store
- Portal
- "I will tell you only after NDA" Project
- "I don't have a clue, but I need some"
